

### **General Guidelines**

We publish articles that include a humanistic perspective of all areas of occupational therapy. This includes articles that contribute to the further development of occupational therapy (e.g. new methods, theories, research reports, developments in the field of education and practice) or that provide an insight into the practical and scientific work of occupational therapists. It is necessary to contact the editorial team to arrange the terms concerning the date of publication. Articles that are sent spontaneously or at the last minute are taken into consideration whenever possible. We only accept previously unreleased articles that are not offered to any other journal at the same time. Reprints are arranged separately.

### **Structural Guidelines**

Prior to the article an abstract (max. 250 words) of it has to be sent to the editor per mail.

Articles have to be written in Word and sent to [redaktion@ergotherapie.at](mailto:redaktion@ergotherapie.at)

The article has to include an abstract with a maximum of 250 words.

### **Integration of Charts, Graphs and Figures**

Figures are possible in black-and-white or color. Pictures, tables etc. must be added in a separate file.

Pictures have to be sent in original size (between 300 KB and 3 MB)

### **Length of texts**

Please consider the following guidelines concerning the length of the texts:

- Articles on key topics: max. 4-6 printed pages or about 18,000-27,000 characters including spaces, without figures
- Articles beyond the key topics: max. 4 printed pages or about 18,000 characters including spaces, without figures
- Project Reports: max. 2 printed pages or about 9,000 characters including spaces, without figures

Editorial reasons can lead to text reductions even though the author followed the guidelines concerning the lengths of the text. Such text reductions, however, have to be arranged between the editorial team and the author. For best planning, please inform the editorial team of your rough number of printed pages as soon as it can be estimated. In reasonable cases and according to prior agreement with the editorial team, we also publish longer articles.

### **Contact Details**

At the end of the article please enclose your name, title, institution, city as well as a picture of yourself. You can also include your telephone number and email address if you wish. It is, of course, acceptable if you do not wish to send a picture of yourself.

### **List of references**

#### Inside the text

- Books from one author: last name of author, year of publication (e.g. Bauer, 2010)
- Books from two authors: last name of one author and last name of the other author, year of publication (e.g. Romein&Espei,2015)
